About Us

MiDevice is a Michigan-based organization dedicated solely to medical device design, development, manufacturing and distribution. The Consortium works to speed the growth and development of medical devices by emphasizing and encouraging collaboration among members to meet overall product lifecycle and supply chain needs. We are leveraging these competencies to grow the medical device industry in the region into a nationally recognized medical device cluster.

We have over 20 talented technical companies that are also strong businesses. Fundamentally, our heritage in West Michigan is designing, building and delivering quality products that are durable and produced to high tolerances. These skills are readily transferable – and needed – for medical devices.

How We Work

MiDevice is able to help you at every step of the medical device development process. Our diverse experience includes state-of-the-art equipment and a world-class workforce trained in advanced manufacturing. We are able to deliver the high-quality prototypes, designs and finished products you need to secure investment, gain regulatory approvals and bring your product to market.

Your Product + Our Companies = Success

The companies of the consortium provide high-tech solutions for every stage of the medical device product lifecycle. Our unique collection of core competencies provides a one-stop resource for all of your product needs - from ideation through distribution.

Our members are committed to working with you to ensure a timely, seamless and cost effective solution. We pride ourselves on offering world-class expertise and service through the wide range of capabilities and experience of our member companies. We're big enough to do it all, and flexible enough to customize a solution to fit your needs.
